- Art.-No.: 00950000
- Weight: 650 g
- Mass: 330 mm

The new slate cutter from

FREUND[®]
... your tool

MasterCut®

It works both ways up.....
and it makes cutting slates easier than ever before.

What's different about the MasterCut®?

Almost everything!

55mm blade length

Cuts and punches natural and hand-made slates up to 7mm thick

Superior new design lets you see the whole cutting length

Excellent ergonomics give optimum cutting angle and reduces hand fatigue

Comfortable handle makes working much easier and eliminates pinched fingers

Simple design makes cleaning and maintenance much easier. By loosening two screws all the moving parts can be accessed

Strong hole punch and sturdy non-breakable spring saves time and energy

2 year warranty

Spare parts available

Scan the QR-Code for further informations.

So how does it work both ways up?

To cut slate, leaving a chamfered top edge, use it with the hole punch down and follow the cutting line with the V guide.

Turn it over to cut fibre cement, giving a clean and precise cut.

Slate

Fiber cement
