

Universal Sub-Base

- Circular sub-base offers maximum versatility.
- Precision machined from aluminium with a low friction surface coating
- Designed to accept standard Axminster or Trend style guide bushes.
- Suitable for a wide range of routers; including Bosch, Makita, Elu, DeWalt, Festool, Trend, Ryobi, Hitachi etc.
- Fixing kit is included to cover a variety of thread types.
- 176mm diameter x 7mm thick.

UJK Fixing Kit for Router & Jigs
Code 508626

Optional Precision Steel Guide Bushes

Introduction

Some routers can be difficult to match up with suitable guide bushes and a universal sub base can be the only solution. A round base can be preferable in many circumstances too. The UJK Technology Universal Sub Base is precision machined from aluminium and fitted with a low friction surface for ease of use. It is designed to accept

standard Axminster or Trend style guide bushes and holes for these are drilled with an M4 thread. It is also designed for mounting to a very wide range of different routers, including Bosch, Makita, Elu, Dewalt, Festool, Trend, Ryobi and Hitachi models to name a few. Dimensions: 176mm diameter x 7mm thickness.

The UJK technology brand was launched by Axminster in 2012 with the deliberate intention of encompassing a range of carefully selected products that we hold in high esteem. Many of these products are designed by us and are manufactured here in the United Kingdom, whilst those that are not are entrusted to one of our most respected Far Eastern suppliers. The range, which includes routing, measuring and wood jointing products has already proven to be extremely popular. We are continually striving to develop and increase this range of quality, innovative products and hope that all our discerning customers will become fully aware of the latest UJK technology equipment.

Please dispose of packaging for the product in a responsible manner. It is suitable for recycling. Help to protect the environment, take the packaging to the local recycling centre and place into the appropriate recycling bin.

Only for EU countries

Do not dispose of electric tools together with household waste material. In observance of European Directive 2002/96/EC on waste electrical and electronic equipment and its implementation in accordance with national law, electric tools that have reached the end of their life must be collected separately and returned to an environmentally compatible recycling facility.

UJK Technology is a registered trade mark of Axminster Tool Centre Ltd
