1915 – 2015  
VÖLKE THREADING SOLUTIONS  
– WORLDWIDE COMPETENCE IN  
THREAD-CUTTING TOOLS

Based on the experience of 100 years in the production of thread cutting tools VÖLKE has developed into a worldwide leading supplier of standard thread cutting tools, all available from stock.

As a family business we are able to react flexibly and quickly to future challenges. The families Völkel (Remscheid) and Carrington (Birmingham) are committed to the long-term and sustainable implementation and the compliance of these promises.

1915 – 2015  
VÖLKE THREADING SOLUTIONS  
– COMPETENTI A LIVELLO MONDIALE NEGLI  
UTENSILI PER FILETTARE

Grazie a una esperienza di 100 anni nel campo della filettatura VÖLKE si attesa come uno dei leader di mercato nell'offerta di utensili per filettare sempre disponibili a magazzino.

Siamo una azienda familiare in grado di reagire rapidamente e in modo flessibile alle sfide che il mercato ci pone. Le famiglie Völkel (Remscheid) e Carrington (Birmingham) si impegnano per la realizzazione e il mantenimento di progetti durevoli e a lungo termine.

## because available ■

... because you rely on a availability of more than 99% on all catalogue items

- more than 7.000 articles available on a daily basis
- article in catalogue with an availability of more than 99 %
- dispatch of small orders on the same day
- special dimensions from 1 to 110 mm

...poiché si può contare su una capacità di spedizione immediata di oltre 99% degli articoli a catalogo

- oltre 7000 prodotti subito disponibili
- disponibilità di magazzino di oltre il 99% di tutti gli articoli a catalogo
- spedizione in giornata
- misure piene e mezze da 1 mm a 110 mm

## because reliable ■

... because we keep our promises and you benefit from a guaranteed constant good quality for the industry

- guaranteed constant, good quality for the industry
- high process and service quality
- central: final control, qualitymanagement, storage, picking and distribution

...poiché manteniamo le promesse e potete contare su una qualità e un servizio sempre costante

- potete contare su un livello di qualità uniforme a livello industriale
- elevata qualità di processo e di servizio
- Sede centrale: controllo finale del prodotto, sicurezza della qualità, immagazzinamento, ordinativi, distribuzione

## because you ■

... because you are our priority and we offer an attractive package for a successful and profitable cooperation.

...poiché per noi siete il punto centrale e vi offriamo quindi una collaborazione completa ed efficiente.

### Application:

#### for general use

- non abrasive material up to 900 N/mm<sup>2</sup>
- unalloyed and low alloyed steel
- for through and blind holes
- for thread cutting by hand

#### How to order/esempio come ordinare:

- M3 = 27626
- M3, No. 1 = 27626-1
- M3, No. 2 = 27626-2
- M3, No. 3 = 27626-3

### Applicazione:

#### per uso universale

- Materiali con buona trucidibilità fino a R 900 N/mm<sup>2</sup>
- Acciaio non legati e scarsamente legati
- Fori passanti e ciechi
- Uso manuale

### Application:

#### for general use

- non abrasive material up to 900 N/mm<sup>2</sup>
- unalloyed and low alloyed steel
- for through and blind holes
- for thread cutting by hand

#### How to order/esempio come ordinare:

BSW 1/8 = 22306  
 BSW 1/8, No. 1 = 22306-1  
 BSW 1/8, No. 2 = 22306-2  
 BSW 1/8, No. 3 = 22306-3

### Applicazione:

#### per uso universale

- Materiali con buona trucioidibilità fino a R 900 N/mm<sup>2</sup>
- Acciaio non legati e scarsamente legati
- Fori passanti e ciechi
- Uso manuale

UNEF 1" x 20	130	45	16.0	14.0	83833	27,80	83,40

### Application:

#### for general use

- non abrasive material up to 900 N/mm<sup>2</sup>
- unalloyed and low alloyed steel
- for through and blind holes
- for thread cutting by hand

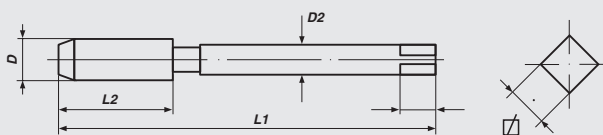

### How to order/esempio come ordinare:

UNEF 1/4 = 83821  
 UNEF 1/4, No. 1 = 83821-1  
 UNEF 1/4, No. 2 = 83821-2  
 UNEF 1/4, No. 3 = 83821-3

### Applicazione:

#### per uso universale

- Materiali con buona trucioidibilità fino a R 900 N/mm<sup>2</sup>
- Acciaio non legati e scarsamente legati
- Fori passanti e ciechi
- Uso manuale

**Application:**

**for general use**

- non abrasive material up to 900 N/mm<sup>2</sup>
- unalloyed and low alloyed steel
- for through and blind holes
- for thread cutting by hand

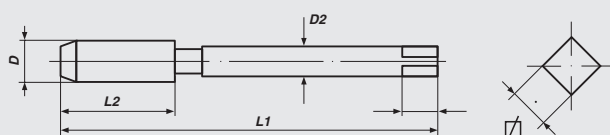

**How to order/esempio come ordinare:**

- M 6 x 0.75 = 26007
- M 6 x 0.75, No. 1 = 26007-1
- M 6 x 0.75, No. 2 = 26007-2

**Applicazione:**

**per uso universale**

- Materiali con buona trucidibilità fino a R 900 N/mm<sup>2</sup>
- Acciaio non legati e scarsamente legati
- Fori passanti e ciechi
- Uso manuale

## SHORT MACHINE TAPS MASCHI A MACCHINA CORTI

for thread cutting by hand and machine  
per uso manuale e con macchina

### Form A

6-8 Threads Lead, for short through holes  
Imbocco a 6-8 spire, per fori passanti corti

### Form B

4-5 Threads Lead with Spiral Point for through holes  
Imbocco a 4-5 spire con imbocco corretto, per tutti i fori passanti

### Form C

2-3 Threads Lead, for blind holes  
Imbocco a 2-3 spire, per fori ciechi

### Form D

4-5 Threads Lead, for through and blind holes  
Imbocco a 4-5 spire, per fori passante e ciechi

### Form C/35° RSP

2-3 Threads Lead, 35° Spiral Flute, for blind holes  
Imbocco a 2-3 spire spirale destra a 35°, per fori ciechi

### Form B-AZ

4-5 Threads Lead with Spiral Point and interrupted threads  
for through holes  
Imbocco a 4-5 spire e denti alternati per fori passanti

#### Application:

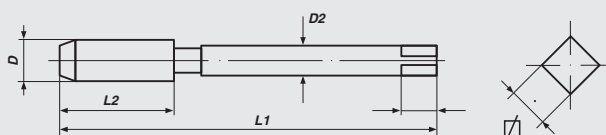

##### for general use

- non abrasive material up to 900 N/mm<sup>2</sup>
- unalloyed and low alloyed steel
- for thread cutting by hand and machine

**Form C:** for through and blind holes

**Spiral Point:** for through holes

**Spiral Flute:** for blind holes

#### Applicazione:

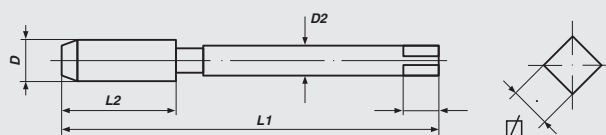

##### per uso universale

- Materiali con buona trucidibilità fino a R 900 N/mm<sup>2</sup>
- Acciaio non legati e scarsamente legati
- per uso manuale e con macchina

**Forma C:** per fori passanti e ciechi

**Forma B:** per fori passanti

**35° RSP:** per fori ciechi

## HexTap S

### Technical Information:

VÖLKE-Threading-Bits have been designed for thread cutting using battery-powered screwdriver drills and electric hand drills with right-hand and left-hand rotation. But they are also suitable for thread cutting by hand or in a stationary drilling machine. Your battery-powered screwdriver drill should have a minimum power of 7.5 Volts. Take care that the tool and the axis of the hole are exactly aligned and use a suitable cutting oil.

The following technical data apply for thread cutting using battery-powered screwdriver drills and electric hand drills:

Dimensions/Dimensione	M 3	M 4	M 5	M 6	M 8	M 10
Core hole dia./Diametro del Preforo Ø	2,5 mm	3,3 mm	4,2 mm	5,0 mm	6,8 mm	8,5 mm
RPM/ Giri/min	Lowest setting (0 - 450 RPM)/minima regolazione					
Torque/Valore di serraggio	Maximum setting/massima regolazione					

## HexTap S

### Informazioni tecniche:

I maschi corti tipo bits Völkel sono concepiti per uso con avvitatori a batteria e trapani elettrici a mano con rotazione destra e sinistra, ma possono anche essere utilizzati per la filettatura a mano o con trapani a colonna. Adatti per uso con avvitatori a batteria con tensione minima pari a 7,5 V. Necessari per un buon utilizzo sono il corretto centraggio del maschio con il foro e l'impiego di un adeguato olio da taglio. Per la maschiatura con avvitatori a batteria e trapani elettrici a mano possono essere impiegati i seguenti parametri tecnici:

## HexTap DS

### Application:

#### for general use

- non abrasive material up to 900 N/mm<sup>2</sup>
- unalloyed and low alloyed steel
- for through and blind holes
- for thread cutting by hand

#### Technical Information:

VÖLKEL-Combined-Bits have been designed for drilling, tapping and deburring in one operation using battery-powered screwdriver drills and electric hand drills with right-hand and left-hand rotation, but they are also suitable for thread cutting in a stationary drilling machine. The Combined Bit is suitable for universal use in materials of medium mechanical strength, non ferrous metals and thermoplastics (up to 600 N/mm<sup>2</sup> tensile strength). It is possible with this tool to produce through threads up to a maximum threaded depth of 1 x D. They are especially useful for mounting and small batch production. Take care that the tool and the axis of the hole are exactly aligned and use a suitable cutting oil.

The following technical data apply for using battery-powered screwdriver and electric hand drills:

#### Informazioni tecniche:

I bits combinati Völkel sono concepiti per uso con trapani a batteria e a mano a rotazione destra e sinistra, ma sono adatti anche per un uso con trapani a colonna. Questi utensili sono utilizzati per la lavorazione dell'acciaio, metalli non ferrosi e plastiche (fino a 600 Nm<sup>2</sup> di resistenza). Adatti per la maschiatura di fori passanti con una profondità massima di 1xD. Sono particolarmente utilizzati nei lavori di montaggio e nella produzione di piccole serie. Necessari per un buon utilizzo sono il corretto centraggio del maschio con il foro e l'impiego di un adeguato olio da taglio. Per la maschiatura con trapani a batteria e a mano possono essere impiegati i seguenti parametri tecnici:

Dimensions/Dimensione	M 3	M 4	M 5	M 6	M 8	M 10
Core hole dia./ Diametro del Preforo Ø	2,5 mm	3,3 mm	4,2 mm	5,0 mm	6,8 mm	8,5 mm
max. RPM/Max n° giri (UpMgiri/m)	1600 UpM	1200 UpM	950 UpM	800 UpM	600 UpM	450 UpM

### Application:

The Combined Tap enables the user to produce the tapping drill hole and the through thread in one operation without any tool changing.

The tool incorporates a twist drill before the thread-tapping part. It is possible with this tool to produce through threads up to a maximum threaded depth of 2 x D.

The Combined Tap is suitable for universal use in materials of medium mechanical strength:

non-alloyed and alloyed steel sorts up to 600 N/mm<sup>2</sup>, malleable cast iron, nodulized graphite cast iron, copper, brass, aluminium, aluminium-magnesium and zinc alloys, red bronze, electron metal, pressure-cast zinc.

It is sensible to use this tool on machines possessing an RPM switchover facility for drilling and tapping.

The feed rate must be adapted to the particular operation required - drilling or tapping.

Tapping chucks with pressure compensation may not be used.

### Applicazioni:

Combinazione di maschio con punta per forare e maschiare velocemente in un'unica operazione, senza cambiare l'utensile. Una punta elicoidale precede il maschio.

Possono essere realizzati unicamente filetti per fori passanti con profondità massima pari a 2xD. I maschi combinati possono essere utilizzati per uso universale su materiali di media resistenza: acciai legati e non legati fino a 600 N/mm<sup>2</sup>, ghisa, ghisa sferoidale, rame, ottone, alluminio, leghe di alluminio e magnesio, leghe di zinco, ghisa rossa, elektron e ghisa pressofusa allo zinco.

La velocità di taglio e l'avanzamento dovranno essere adattati secondo l'operazione svolta, foratura o maschiatura. Pertanto questi utensili vanno impiegati su macchine a velocità variabile con possibilità di regolazione dei numeri di giri. Non utilizzare con mandrini a compensazione di pressione.

#### Application:

##### for general use

- non abrasive material up to 900 N/mm<sup>2</sup>
- unalloyed and low alloyed steel
- for through holes

##### TIN-coating:

- improved resistance to wear and abrasion
- excellent anti-friction properties
- faster cutting speeds possible

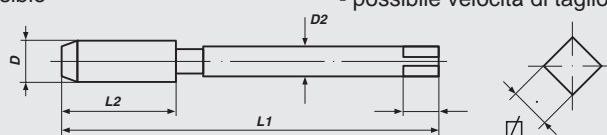

#### Applicazione:

##### per uso universale

- Materiali con buona trucidabilità fino a R 900 N/mm<sup>2</sup>
- Acciaio non legati e scarsamente legati
- per fori passanti

##### rivestimento TIN

- migliore resistenza all'abrasione e alla rottura
- eccellente uniformità
- possibile velocità di taglio superiore

#### Application:

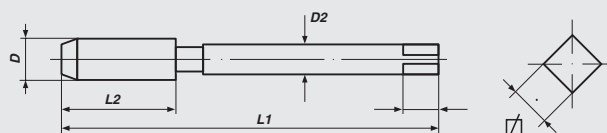

##### for general use

- non abrasive material up to 900 N/mm<sup>2</sup>
- unalloyed and low alloyed steel
- long chipping material
- for through holes

#### Applicazione:

##### per uso universale

- Materiali con buona truciabilità fino a R 900 N/mm<sup>2</sup>
- Acciaio non legati e scarsamente legati
- Materiali truciolo lungo
- per fori passanti

### Application:

#### for general use

- non abrasive material up to 900 N/mm<sup>2</sup>
- unalloyed and low alloyed steel
- for through holes

### Applicazione:

#### per uso universale

- Materiali con buona trucidibilità fino a R 900 N/mm<sup>2</sup>
- Acciaio non legati e scarsamente legati
- per fori passanti

**Application:**

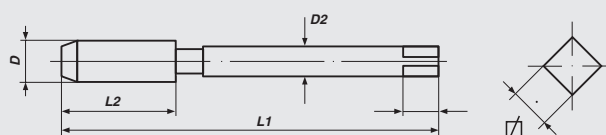

**for general use**

- non abrasive material up to 900 N/mm<sup>2</sup>
- unalloyed and low alloyed steel
- for blind holes

**Applicazione:**

**per uso universale**

- Materiali con buona truciabilità fino a R 900 N/mm<sup>2</sup>
- Acciaio non legati e scarsamente legati
- per fori ciechi

#### Application:

##### for general use

- non abrasive material up to 900 N/mm<sup>2</sup>
- unalloyed and low alloyed steel
- for blind holes

#### Applicazione:

##### per uso universale

- Materiali con buona truciocibilità fino a R 900 N/mm<sup>2</sup>
- Acciaio non legati e scarsamente legati
- per fori ciechi

### Application:

#### for general use

- non abrasive material up to 900 N/mm<sup>2</sup>
- unalloyed and low alloyed steel
- for through and blind holes

### Applicazione:

#### per uso universale

- Materiali con buona trucidibilità fino a R 900 N/mm<sup>2</sup>
- Acciaio non legati e scarsamente legati
- per fori passanti e ciechi

### Application:

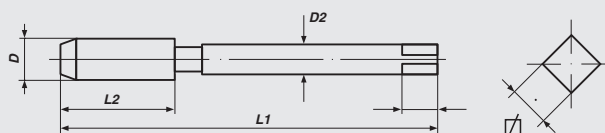

#### for general use

- non abrasive material up to 900 N/mm<sup>2</sup>
- unalloyed and low alloyed steel
- for through holes

### Applicazione:

#### per uso universale

- Materiali con buona trucidibilità fino a R 900 N/mm<sup>2</sup>
- Acciaio non legati e scarsamente legati
- per fori passanti

M 16 x 2.0	110	32	12.0	9.0	30039	90,00

#### Application: for general use

- non abrasive material up to 1.000 N/mm<sup>2</sup>
- stainless and alloyed steel
- unalloyed and low alloyed steel
- Copper- and Aluminium-alloys
- for through holes

#### Advantages HSSE-PM-TIN

- increased wear resistance and toughness
- TiN-coating improves anti-friction properties, thereby improved wear-resistance and reduced tendency of build-up edge

#### Applicazione per uso universale

- Materiali con buona trucidibilità fino a R 1.000 N/mm<sup>2</sup>
- Acciaio inossidabili e legati
- Acciaio non legati e scarsamente legati
- Leghe di rame e alluminio
- per fori passanti

#### Vantaggio HSSE-PM-TIN

- maggiore resistenza all' abrasione e tenacità
- migliore uniformità per mezzo di rivestimento TiN, riducendo così l'usare e ridotta tendenza di impasti per saldature

M 20 x 2.5	140	34	16.0	12.0	35467	60,90

#### Application:

##### wear resistant steel up to 1200 N/mm<sup>2</sup>

- high alloy steel
- short chipping material
- short chipping stainless steel
- alloy tool steel
- for through holes

##### TiCN

- outstanding wear-resistance due to improved hardness and toughness
- intensive and optimum cooling essential as reduced heat resistance

#### Applicazione

##### Acciaio resistente all'usura a 1.200 N/mm<sup>2</sup>

- acciaio alto legato
- Materiali duro con truciolo corto
- Acciaio inossidabile con truciolo corto
- Acciaio utensili legati
- per fori passanti

##### TiCN

- eccellente resistente all'usura per mezzo di durezza e tenacia migliorata
- intensa e ottimale lubrificazione è obbligatorio, perché minore resistenza al calore

M 10 x 1.5	100	16	10.0	8.0	36146	17,00

#### Application:

##### short-chipping Material from 1200 N/mm<sup>2</sup> tensile strength

For through and blind holes.  
Due to the very robust execution and the special profile of the flutes this Machine Tap is suitable for extreme applications.  
The lead Form A and an additional short lead make working easier.

#### Applicazione:

##### Materiali con truciolo corto da 1.200 N/mm<sup>2</sup> resistenza alla trazione

per fori passanti e ciechi  
Dalla versione particolarmente robusto e speciale profilo delle scanalature di questo maschi è adatto per applicazioni estreme.  
L'imbocco a Forma A e un aggiuntivo imbocco corto facilitano la lavorazione

TWINBOX  
Machine Tap + Twist Drill  
TWINBOX  
Maschi a macchina + punte

Only Machine Taps which are suitable for the application achieve the optimum results. TwinBoxes include Coloured Ring Machine Taps together with the tapping size Drill for most efficient use and best results. Using Machine Taps and Twist Drills which are both suitable for the application will improve the quality of the thread and reduce costs.

Solo attraverso l'impiego di utensili specifici per un determinato materiale è possibile raggiungere un risultato preciso. Confezioni Twin con maschi a macchina con collarino e relative punte consentono una flessibilità di impiego maggiore. Attraverso l'impiego di punte specifiche per un determinato materiale è possibile aumentare la qualità del filetto.

## FLUTELESS MACHINE TAPS MASCHI A RULLARE

### Application:

- Unalloyed and low alloyed Steel
- Constructional Steel
- heat resistant Steel
- Stainless Steel
- long-chipping nonferrous Metal
- Zinc Alloys
- for through and blind holes

### Applicazione:

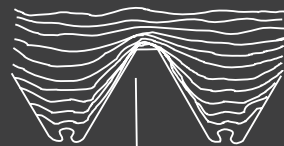

- Acciaio non legati e scarsamente legati
- Acciaio da costruzione
- Acciaio resistenti al calore
- Acciaio inossidabile
- Materiali non ferrosi truciolo lungo (Alluminio, Bronzo, Rame, Ottone)
- Leghe forgiate
- per fori passanti e ciechi

### Benefit:

- ✓ longer endurance as cutting taps
- ✓ higher possible cutting speed
- ✓ steady exactness of dimension and profile
- ✓ high stability of the forming threads
- ✓ high security against fracture
- ✓ no removal of swarf, no jaming of swarf

### Vantaggio:

- ✓ Elevata durata
- ✓ Velocità di rotazione più elevata
- ✓ Quota e precisione del profilo costanti
- ✓ Più elevato carico ammissibile del filetto realizzato
- ✓ Maggiore resistenza alla rottura
- ✓ Elevata resistenza alla rottura
- ✓ Nessuna produzione di truciolo e relative problematiche

Fibre structure  
of thread forming  
Andamento delle fibre  
per filettatura rullata

Fibre structure  
of thread cutting  
Andamento delle fibre  
per filettatura tagliata

### Fluteless Taps (Forming Taps)

are threading tools to form internal threads without cutting. The thread is produced by deformation of the material without damaging the fibre structure.

Maschi a rullare e utensili per la filettatura per la produzione di filetti riportati senza produzione di truciolo. Il filetto viene prodotto per deformazione del materiale, mantenendo intatto l'andamento delle fibre.

## FLUTELESS MACHINE TAPS MASCHI A RULLARE

	blank lucido	VAP	TIN
6H ISO2	153	154	155
6G ISO3	156		

### Application:

#### **bright:**

- for nonferrous metal of good ductility

#### **VAP (Steam Tempered):**

- for steel up to approx. 700 N/mm<sup>2</sup>

#### **TIN (Titanium Nitride Coating):**

- for steel up to approx. 900 N/mm<sup>2</sup>  
and to increase endurance and cutting speed

### Applicazione:

#### **Lucido:**

- per materiali non ferrosi con buona deformabilità

#### **VAP (vaporizzato):**

- per acciaio a ca. 700 N/mm<sup>2</sup>

#### **TIN (revestimento di nitruato di titanio):**

- per acciaio a ca. 900 N/mm<sup>2</sup>  
per l'aumento della vita utensile e della velocità di taglio

**because available ■ because reliable ■ because you ■**

## RECOMMENDED APPLICATION OF FLUTELESS MACHINE TAPS PER MASCHI A RULLARE

Material Materiali	bright lucido	VAP	TIN
unalloyed and low alloyed Steel Acciaio non legati e e baso legati, truciolo corto			x
heat resistant Steel Acciaio resistenti al calore			x
Stainless Steel Acciaio inossidabile		x	x
Constructional Steel Acciaio da costruzione		x	x
Brass, long-chipping Ottone, truciolo lungo	x		
Bronzes, long-chipping Bronzo, truciolo lungo	x		
Copper Rame	x		
Al-alloys, long-chipping Alluminio, truciolo lungo	x		
Zinc Alloyes Leghe forgiate	x		

### Oil Groove:

Use Fluteless Taps with Oil Groove for thread depth over 1,5 x D to optimize lubrication.

### Lubrication:

Good lubrication is very important when forming threads.  
Use graphitic lubrication/oil with lubricity or add suitable additives.

### Canali di espulsione:

Per profondità del filetto oltre 1,5xD si possono utilizzare i maschi a rullare con canali di espulsione per una ottimale sbavatura

### Lubrificazione:

Buona lubrificazione e buone proprietà antifrizione sono molto importanti nel caso dei maschi a rullare. Impiegare refrigeranti e lubrificanti/olii alla grafite oppure aggiungere additivi appropriati

**Application:**

**for general use**

- non abrasive material up to 800 N/mm<sup>2</sup>
- unalloyed and low alloyed steel

**Applicazione:**

**per uso universale**

- Materiali con buona trucidibilità fino a R 800 N/mm<sup>2</sup>
- Acciaio non legati e scarsamente legati

**Benefit:**

- high cutting ability
- reduction of torque
- uninterrupted swarf flow in direction of feed
- prevents jamming of swarf

**Application:**

- abrasive material up to 1200 N/mm
- INOX (stainless steel)
- and general use

**Vantaggio**

- elevata durata
- taglio più facile
- libero scarico del truciolo dal davanti
- nessun intasamento dei lobi di evacuazione del truciolo

**Applicazione**

- materiali di difficile truciolabilità
- Acciaio inossidabili
- e per uso universale

SURFACE FINISHES  
ACABADOS SUPEFICIALES

Each VÖLKEL Tap and each VÖLKEL Die can be supplied with any coating or surface finish quickly.

Ogni maschi VÖLKEL e filiere VÖLKEL può essere offerto con qualsiasi rivestimento o trattamenti termici breve

## SURFACE FINISHES ACABADOS SUPEFICIALES

### **Steam Tempered:**

An iron oxide film is created on the tool surface by heat treatment.

This improves the adhesion of the coolant and as a result helps to prevent cold welding of the chip to the tool surface.

### **Vaporizzazione**

Attraverso un trattamento termico sull'utensile finito si deposita uno strato di ossido di ferro sulla superficie dell'utensile.

Questo strato migliora l'aderenza del refrigerante e del lubrificante, riducendo così il rischio di rottura del film lubrificante evitando la formazione di saldature a freddo di scorie.

### **Nitriding:**

The surface hardness is increased by enriching the surface of the tap with nitrogen. This results in high abrasion resistance and improved anti-friction properties.

### **Nitrurazione**

L'arricchimento della superficie del maschio con azoto permette di aumentare la durezza della superficie dell'utensile. Si ottiene altresì un miglioramento della resistenza all'abrasione e delle proprietà antifrizione.

### **TiN (Titanium Nitride Coating):**

Following PVD processing, the tap undergoes titanium nitride vapour-deposition within the vacuum chamber at approx. 500°C. Excellent anti-friction properties and high resistance to wear and abrasion result from the reduced surface roughness and remarkable hardness.

TiN coated taps can be employed using considerably faster cutting speeds.

### **TiN (Rivestimento al Nitruro di Titanio):**

Attraverso il procedimento di metallizzazione a vuoto a 500°C ca. (PVD) viene depositato sull'utensile uno strato vaporizzato di nitrato di Titanio. La riduzione della rugosità della superficie e la durezza estrema permettono di ottenere eccellenti proprietà antifrizione e una forte resistenza all'usura e all'abrasione.

I maschi rivestiti al TiN possono essere utilizzati con velocità di taglio nettamente più elevate.

### **TiCN (Titanium CarboNitride Coating):**

The TiCN-coating is particularly suitable for wear-resistant and abrasive material. The TiCN-coating has an hardness of 3.000 HV and thus is harder as the TiN-coating (2.600 HV). As a result the TiCN-coating has an excellent wear-resistance. Also the hardness and the toughness is higher, the heat resistance is reduced. Therefore intensive and optimum cooling is essential.

### **TiCN (Rivestimento con carbonitruro di titanio):**

Il rivestimento TiCN è particolarmente indicato per acciai ad elevata resistenza all'abrasione e materiali altamente abrasivi. Il rivestimento TiCN ha una durezza pari a 3.000 HV quindi risulta essere più duro rispetto al rivestimento TiN (2.600 HV); ciò comporta un miglioramento della resistenza all'usura dell'utensile. Una maggiore tenacità all'abrasione è contrapposta a una minore resistenza alle elevate temperature. Perciò è fondamentale una ottima refrigerazione dell'utensile rivestito.

6G	ISO 3	6G, 7H, 8H	oversize (M12x1,5 7G = ISO2/6H + 0,03 mm) tolleranza maggiorata (p.es. a M 12x1,5-6G = ca. + 0,03 mm, riferito a ISO 2/6H)
7G	./.	7G, 8G, (6E)	oversize (M12x1,5 7G = ISO2/6H + 0,06 mm) tolleranza maggiorata (p.es. a M 12x1,5-7G = ca. + 0,06 mm riferito a ISO 2/6H)
4HX	ISO 1X	4H, 5H	manufacturer tolerance for special materials (X = small oversize, 4HX ≈ ISO2/6H) Classe di tolleranza speciale per materiale speciale (X = minor tolleranza maggiorata 4 HX corrisponde ≈ ISO 2/6H)
6HX	ISO 2X	6H	manufacturer tolerance for special materials (X = small oversize, 6HX ≈ ISO3/6G) Classe di tolleranza speciale per materiale speciale (X = minor tolleranza maggiorata 6HX corrisponde ≈ ISO 3/6G)
6GX	ISO 3X	6G	manufacturer tolerance for special materials (X = small oversize, 6GX ≈ 7G) Classe di tolleranza speciale per materiale speciale (X = minor tolleranza maggiorata 6GX corrisponde ≈ 7G)
6H + 0,1	ISO 2 + 0,1	4G, 5G, 6H	+ 0,1 mm oversize for galvanic coatings and surface finishing with thickness of Layer up to 25 µm tolleranza maggiorata 0,1 mm, per strato di protezione galvanica e superficie raffinato con spessore fino 25 µm
6H + 0,2	ISO 2 + 0,2	4G, 5G, 6H	+ 0,2 mm oversize for galvanic coatings and surface finishing with thickness of Layer up to 50 µm tolleranza maggiorata 0,2 mm, per strato di protezione galvanica e superficie raffinato con spessore fino 25 µm

The required oversize of the tap with galvanic coatings depends on the thread angle.

The oversize O can be calculated with the following approach formula:  $O = S \times F$

S = thickness of the layer / F = factor depending on the thread angle a ( $F = 2 / \sin a / 2$ )

tolleranza maggiorata necessaria da strato di protezione galvanica e dipendente dall'angolo del profilo

tolleranza maggiorata O può essere calcolata con la seguente formula:  $O = S \times F$

S = spessore dell rivestimento galvanico / F = fattore dipendente di angolo del profilo a ( $F = 2 / \sin / 2$ )

Thread angle /Angolo del profilo	30°	47°/30'	55°	60°	80°	90°
